

Commercial Immersion and Surface Mounted Energy Saver Electric Water Heater

Photo is of
M-II-50-kW-3SF

The Immersion and Surface Mounted Electric Models Feature:

- **Surface Mounted Thermostat Step Control (modulation)**—Can be accomplished by variable setting on thermostats (each element has an individual thermostat and high limit).
- **Immersion Thermostats**—Immersion type for accurate temperature control from up to 180°F (82°C) with manual reset high limit control.
- **3" (76mm) Non-CFC foam insulation**—Covers the sides and top of tank, reducing the amount of heat loss. This results in less energy consumption, improved operation efficiencies and jacket rigidity.
- **Factory Installed Hydrojet® Sediment Reduction System**—Cold water inlet sediment reducing device helps prevent sediment build up in the tank.
- **Vitraglas® Lining**—Bradford White tanks are lined with an exclusively engineered enamel formula that provides superior tank protection from the highly corrosive effects of hot water. This formula (Vitraglas®) is fused to the steel surface by firing at a temperature of over 1600°F (871°C).
- **Water Connections**—1½" NPT factory installed true dielectric fittings extend water heater life and eases installation.
- **Elements**—Screw in style. Surface mounted thermostat models have elements made of nickel chromium wire embedded in magnesium oxide, sheathed in copper and electroplated to minimize degradation of the anode. Incoloy sheathed elements are optional (Incoloy elements are standard for all 600 volt models). Immersion thermostat models have low watt density incoloy sheathed elements standard which resists burnout caused by dry fire or lime buildup.
- **Two Magnesium Anode Rods**—Provide added protection against corrosion for long trouble free service.
- **Hand Hole Cleanout**—Allows inspection of tank interior and facilitates the removal of sediment deposits.
- **ASME Construction Available.**
- **NSF Construction Available.**
- **Low Restriction Brass Drain Valve**—Durable tamper proof design.
- **T&P Relief Valve**—Installed.
- **Completely Pre-wired**—With pressure lug terminal block eliminating need for splicing or taping of wires.
- **Voltages Available**—208v, 240v, 277v, 380v, 415v, 480v and 600v.

3 or 5-Year Limited Tank Warranties / 1-Year Limited Warranty on Component Parts.

For more information on warranty, please visit www.bradfordwhite.com

For products installed in USA, Canada and Puerto Rico. Some states do not allow limitations on warranties. See complete copy of the warranty included with the heater.

Commercial Electric Water Heater

Energy Saver Models

Meet or exceed ASHRAE 90.1b (current standard) C.E.C. Listed

Model numbers shown are for Surface Mount thermostats.

For Immersion thermostat change suffix "SF" to "CF".

Voltage and phase must be specified when ordering.

Example: M-II-50-12-3SF, 240 Volt, 3 phase.

(A) ASME Construction available.

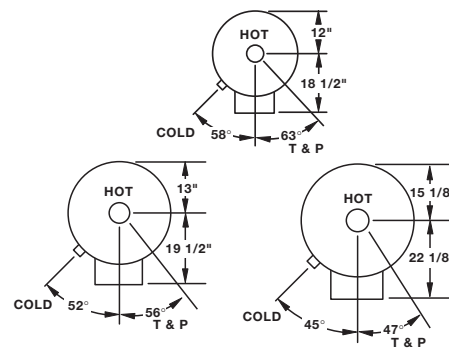

For ASME construction add "A" to the model number.

Example: M-II-50A-12-3SF.

54	558	447	372	319	279	248	223	186	160	

Optional surface thermostats ranging from 80°F to 140°F are available.

Sample Specification

The water heater shall be a Bradford White model with a rated storage capacity of not less than _____ gallons (_____ liters), a minimum kW input of _____ kW (_____ BTU/Hr.), a minimum recovery of _____ GPH (_____ LPH). The tank shall be Vitraglas® lined and have a bolted hand hole cleanout. The tank shall have _____ magnesium anode rods installed in separate tank head couplings. The heater shall have 3" Non-CFC foam insulation, and come equipped with an ASME rated T&P relief valve, a cold water inlet Hydrojet® Sediment Reduction System. It shall be design certified by ETL for 180°F (82°C) application, either with or without a separate storage tank, and comply with state and local codes and ordinances.

General

All electric water heaters are certified at 300 PSI test pressure (2068 kPa) and 150 PSI working pressure (1034 kPa). All models are design certified by ETL, for up to 180°F (82°C) application as an Automatic Storage Heater, and an Automatic Circulating Tank Heater. As an Automatic Storage Heater, all models are complete, self-contained water heating systems. It needs no separate storage tank, pump, wiring or elaborate piping network. When equipped with a mixing valve, it will supply 180°F (82°C) sanitizing and lower temperature general purpose hot water simultaneously. These models can be used either as a single unit or in multiples connected in series or parallel (recommended). **Dimensions and specifications subject to change without notice in accordance with our policy of continuous product improvement.**
